### THE FUNCTION OF FEEDBACK

**RSI** connection Teaching Learning continuous improvement

Join the community of people that believes quality matters | qualitymatters.org/events

# **FEEDBACK AS A CONTINUUM**

"THE PROCESS ITSELF TAKES ON THE FORMS OF NEW INSTRUCTION, RATHER THAN INFORMING THE STUDENT SOLELY ABOUT CORRECTNESS" (KULHAVY, 1977, P. 212).

# THE FLOW OF FEEDBACK

Join the community of people that believes quality matters | qualitymatters.org/events

# THE FLOW OF FEEDBACK

Join the community of people that believes quality matters | qualitymatters.org/events

# Giving Feedback Opportunities via Design

Join the community of people that believes quality matters | qualitymatters.org/events

# **FAST FEEDBACK THROUGHOUT**

Quick Polls: good for knowledge checks, mental wellbeing check-in, testing misconceptions Reading or lecture follow-up: SA essay, M/C, drag & drop, fill-in-the blank can all provide information on how learners are making sense of new information

## **END-OF-MODULE FEEDBACK**

Include end-of-module surveys with questions to help active teaching and design revision

Consider making it anonymous and awarding participation points, extra credit, etc.

If it's a new course, consider questions on rigor/workload as well

Keep it short, employ multiple-choice options, consider at least one open-ended question

Join the community of people that believes quality matters | qualitymatters.org/events

# **END-OF-COURSE FEEDBACK**

What worked well? What could be improved? What did you experience as barriers to your success?

Questions can be focused on design, teaching, or both. Consider goals and stakeholders.

Make it part of the coursework: "Dear Student" letter or other reflective activity

# **ASSIGNMENT PROMPTS & RUBRICS**

- Ensure students know how they will be evaluated
- Create a FULL assignment prompt:
  - Instructions/Background: Why are we doing this and what are we doing
  - **Evaluation**: How students will be evaluated
  - Submission information: File name and type? When to submit?
- For larger assignments with multiple components, consider a rubric

## YOUR FEEDBACK PLAN

SRS 5.3: The instructor's plan for interacting with learners during the course is clearly stated.

#### **BUILDING IN AUTO-FEEDBACK**

Auto-feedback can be a huge benefit to you and your students

Use liberally in low-stakes activities to direct students to re-engage with critical material

Provide feedback for incorrect and correct responses on quizzes and exams

# **Giving Feedback During Delivery**

Join the community of people that believes quality matters | qualitymatters.org/events

### **FEEDBACK:**

- Fills the "gap" between what is understood and what is aimed to be understood (Sadler, 1989)
- Is aided by affective processes (motivate, engage)
- Is aided by cognitive processes (restructuring information, providing add'l info or alternate strategies)
- Is part of the learning process

#### BASIC TYPES & APPROACHES

#### Acknowledgement Feedback

#### Informative/Formative Feedback

The Sandwich/Oreo Cookie method: Filling without a nice container is unappetizing

### A MODEL OF FEEDBACK

Hattie & Timperley (2007) The Power of Feedback

#### **THREE QUESTIONS**

#### Where am I going?

Connect to Learning Objectives. Reduce discrepancy between understanding and goals.

Create shared commitment.

How am I going?

How do I proceed, what do I do Where to next?

Learning as sequential and recursive/flexible

#### **FOUR LEVELS**

TASK LEVEL

Corrective Feedback. Encourage self-eval and confidence

#### PROCESS LEVEL

Deep understanding of relationships. Enhance deep learning, build confidence with task.

#### SELF-REGULATION LEVEL

Metacognitive skills for self-reflection and direction. Encourage effort and ability & help-seeking

#### SELF LEVEL

Feedback about the person. Link corrective feedback to task and kudos to actual accomplishments

#### **HELPFUL RECOMMENDATION MODEL CAN HELP**

### **FEEDBACK METHODS**

- Written feedback
- Audio feedback
- Screencasted or video feedback
- All should be timely

#### **INDIVIDUAL FEEDBACK FOR LEARNING**

Feedback on assignments that can be used to improve performance and achievement

Timing (of feedback and assignments) is crucial

Depending on student cohort, guide students for how to use feedback

Join the community of people that believes quality matters | qualitymatters.org/events

#### **INDIVIDUAL FEEDBACK FOR CONNECTION**

Reach out to struggling students... especially in the first few weeks.

Respond to "how's it going" type questions from reflective activities

Remember to give "kudos" in feedback

Join the community of people that believes quality matters | qualitymatters.org/events

#### **GROUP FEEDBACK FOR LEARNING**

#### **GROUP FEEDBACK FOR CONNECTION**

"Motivational Mondays" and "Midterm Check-Ups" Make learningrelated feedback a video instead Make learningrelated announcements encouraging and motivating

Join the community of people that believes quality matters | qualitymatters.org/events

#### FEEDBACK IDEA: INSTRUCTOR BLOG

- Extend learning, add optional content or commentary
- Great to keep connection while at conferences
- Can also use as a place for instructor reflection – feedback both for learning & connection

#### FEEDBACK IDEA: END-OF-COURSE WRAP-UP/REFLECTION

- Summarize the big, takeaway ideas
- Comment in positive ways on overall or final performance
- Consider a video, include your own reflection

#### **INSTRUCTOR FEEDBACK FOR REVISION**

- Give yourself feedback: What's working? What's not?
- Any content seem "underappreciated"?
- Any batch of assignments really miss the mark?
- Which assignments were hard to grade or took longer than anticipated, and why?
- Where did you not leave yourself enough time for feedback turnaround?
- What topics were confusing? Did you need to add extra materials? Give grace on assignment grades?

# **Using Feedback during Delivery**

Join the community of people that believes quality matters | qualitymatters.org/events

#### **ADDRESSING ASSIGNMENT ISSUES**

- If feedback (assignment performance, student feedback) indicates confusion, there \*might\* be confusion. Consider having a peer read your assignment prompts.
- What's the issue? Clear instructions? Clear connection? Unprepared? Unmotivated?
- Non-learning issues? Try announcements/reminders, and acknowledgement feedback

### CONTENDING WITH CONTENT ISSUES

- If feedback indicates there was too much, there \*might\* be too much.
  Consider calculating workload
- What's the issue? Too much (length & amount)? Alignment? Not at the right level? What can be optional instead?
- Technical or accessibility issues? Lack of engagement or relevance?
- "Feedback is most valuable when it addresses faulty interpretation, not lack of understanding." (Hattie & Timperley, 2007)

# **TACKLING TEACHING ISSUES**

- If feedback indicates a lack of presence... there \*might\* be a lack of presence. Adopt a student perspective to reflect.
- What's the issue? Students feeling disconnected? Feedback not timely? Do they feel lost or that they are "teaching themselves?
- Connection supports learning. Consider video or screencasted feedback.
- Connect with a colleague or your CTL center to go over some examples of feedback you've provided. Key points: would a student understand the issue? know where to go for review? be clear on how to improve?

# Using Feedback for Design Revision

Join the community of people that believes quality matters | qualitymatters.org/events

#### ALIGNMENT

Anything labeled as "busy work"? Using LMS learning analytics, anything with low interaction? What is extraneous? Students report as "not so helpful"?

 Check alignment. Revise or make it optional/remove.

Submitted by James Fowlkes and Brenda Boyd

#### ASSIGNMENTS

What assignments did you receive the most questions about?

Which did they do poorly on/clearly did not understand or were not prepared?

- Clarify assignment prompts. Provide examples.
  Ensure alignment.
- Review for application, active learning, authentic assessment.

#### **MATERIALS**

Which materials did students use/refer to most heavily? Which were largely ignored? Any technical issues for digital content? Any lower-cost or OER options?

- Refine alignment and consider optional materials. Calculate workload.
- Review materials for engagement: text vs simulation, variety of type, etc.

#### RETHINKING THE STRUCTURE AND FLOW

- In hindsight, any feedback cues that there were issues with sequencing of topics or assignments?
- Did you or your students feel that there was not enough time between feedback and a related assessment?
- Were there any portions that felt "rushed" or that "dragged"?
- What felt "too much"? Content was too long or too much overall, assignment was too deep (needed deconstructed into smaller parts or brought up a level), assignment was too difficult to grade

# **PERSONALLY REFLECT**

- What seemed difficult for students?
- What seemed difficult for you?

Join the community of people that believes quality matters | qualitymatters.org/events

#### **COMMENTS? QUESTIONS?**

#### WHAT ARE YOUR FEEDBACK CHALLENGES? WHAT ARE YOUR FEEDBACK TIPS?
